1. Buatlah ERD Diagram sesuai dengan contoh ERD yang ada pada Dasar Teori modul ini

2. Lengkapi table rentalfilm sesuai dengan Contoh ERD.

- Query:

CREATE TABLE rental_film (
ID int AUTO_INCREMENT PRIMARY KEY,

StaffID integer(10) NOT NULL,

CostumerId integer(10) NOT NULL,

InventoryId integer(10) NOT NULL,

'Rental_Date` TIMESTAMP DEFAULT CURRENT_TIMESTAMP,

'Return_Date` TIMESTAMP DEFAULT CURRENT_TIMESTAMP,

'Last_Update` TIMESTAMP DEFAULT CURRENT_TIMESTAMP

);

ALTER TABLE 'rental_film` ADD CONSTRAINT 'fk_StaffID` FOREIGN KEY ('StaffID')

REFERENCES 'rental_film` ('ID') ON DELETE RESTRICT ON UPDATE RESTRICT;

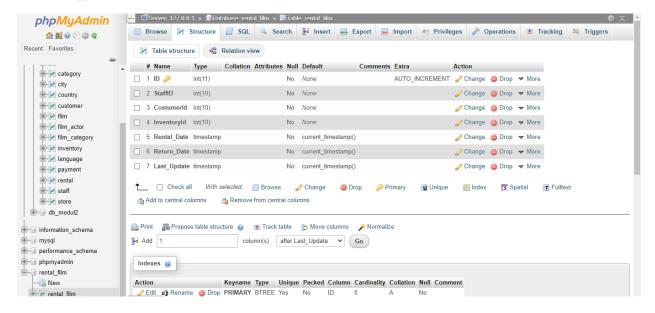

ALTER TABLE 'rental_film` ('ID') ON DELETE RESTRICT ON UPDATE RESTRICT;

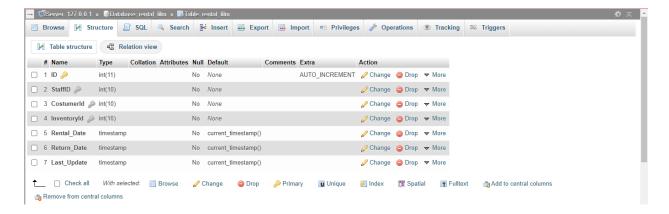

ALTER TABLE 'rental_film` ('ID') ON DELETE RESTRICT ON UPDATE RESTRICT;

ALTER TABLE 'rental_film` ADD CONSTRAINT 'fk_InventoryId' FOREIGN KEY ('InventoryId')

REFERENCES 'rental_film` ('ID') ON DELETE RESTRICT ON UPDATE RESTRICT;

- Hasil

- 3. Lakukan latihan menghapus dan merubah atribut tabel.
 - Query merubah dan menghapus atribut tabel :
 ALTER TABLE rental_film CHANGE StaffID StaffId integer(10) NOT NULL;
 ALTER TABLE rental_film DROP Rental_Date;
 - Hasil
